# Exceed All Limits

Fast and powerful - the best specs in the history of Memory HiCorders

Best-in-Class Flagship Model

Measurement	Blazing fast, never-fail sampling High-speed isolation measurement at 200 MS/s
Storage	Superior processing capacity lets you save data while measuring Save data in real time, 32 times faster than conventional models
Usability	User-friendly design for accurate and smooth operation Intuitive operation via large 12.1-inch touch screen

# Overwhelming high speed technology A revolutionary approach to measurement, recording and analysis

## MEMORY HICORDER MR6000

The MR6000 overcomes all barriers to reach new ground and meet challenges that are yet to be seen. World class specifications, operability and design - Hioki's newest memory recorder has been re-engineered from top to bottom, delivering unprecedented performance that will change how you look at waveform recording. Redefining the world standard for recorders - that is the Hioki MR6000.

# 200MS/s

High-speed optical isolated measurement

## Instant saving Real-time save

Intuitive operation

Increased efficiency of inverters and improved performance of energy-saving technologies have been achieved in the power electronics, renewable energy, and automotive industries. We have drastically improved the technology used in our Memory HiCorders, developing the MR6000 Memory HiCorder to meet the advanced demands of all industries.

# Series-Leading Measurement Performance

## High-speed isolated measurement at 200 MS/s Up to 32 ch in the analog unit and up to 128 ch in the logic unit

The Hioki Memory HiCorder lineup now includes a powerful input unit that unlocks the full measuring potential of the MR6000. The High Speed Analog Unit U8976 boasts the highest sampling rate in its entire series, an order of magnitude faster than conventional models, enabling the unit to perform isolated measurement at 200 MS/s°. Combine multiple modules of the 4ch Analog Unit U8975, which provides 4 channels of input with a speed of 5 MS/s at 16 bits, to perform multi-channel measurements up to 32 channels. Make the most of the Memory HiCorder's capabilities as we continue its development to meet your advanced measurement needs.

200 MS/s measurements can be achieved even if a unit other than the U8976 is connected at the same time. However, the data update rate will not exceed the maximum sampling rate of the unit.

#### Blazing fast, never-fail sampling Record high-precision waveforms

#### HIGH SPEED ANALOG UNIT U8976

You need accurate detection of switching waveforms in inverter evaluation tests, which requires a high level of efficiency. We developed the High Speed Analog Unit U8976 to meet those needs. In addition to high-speed sampling at 200 MS/s, the unit supports frequency bands up to 30 MHz. Adapted to the Memory HiCorder's direct input feature, it supports inputs up to 400 V DC.

Available recor duration	ding		5-second recording

### Install up to 8 units with 4 channels each Measure multiple points simultaneously

4CH ANALOG UNIT U8975 4CH ANALOG UNIT U8978

Our lineup now includes two types of analog units with 4-channel input in a single device. The U8975 supports direct inputs up to 200 V DC, and the U8978 is effective for accurately capturing sensor output using its 100 mV f.s. high sensitivity range. Both units provide a sampling rate of 5 MHz and 16-bit resolution

Conventional sampling (20 MS/s)

## 200 MS/s High-speed sampling

#### Isolated input with optical isolation devices

Connections between analog input channels, and between the input channel and the main unit, are fully isolated. This means that, unlike an oscilloscope, measurements can be made without concern with negative effects from potential differences

Simultaneous measurement of multiple locations across 32 channels at 5 MS/s

# A rich unit lineup for detecting a wide range of phenomena

Combine multiple units to record a range of phenomena. A high-voltage unit with a direct input of 1000 V DC is ideal for measuring global power lines, including uninterruptible power supplies (UPS) and commercial power supplies. Use multiple logic units to measure relay ON/OFF signals or PLC (programmable logic controller) signals across up to 128 channels simultaneously.

Unit interchangeability

The unit types compatible with the MR6000 are identical to the ones compatible with the MEMORY HiCORDER MR8827, MR8847A, MR8740, MR8741, and MR8740-50. Use any of the 15 types listed in the unit selection guide below. However, the U8977, U8978, and U8979 can only be used with the MR6000.

# Concentration of sensing technologies with superior accuracy: A rich set of functions suitable for all measuring purposes

Sensing technology that serves as the key to reliable measurement data is essential for detecting various phenomena across multiple channels. The MR6000 is a high-spec model that fully leverages the performance of Hioki's high-precision sensors.

## Compatible with high-precision sensors for measuring large currents

Combine the Current Unit (8971 or U8977) and a current probe or current sensor designed and manufactured by Hioki to use the system over a wide temperature range or measure large currents with a high level of precision at solar power plants or development sites for EVs/HEVs. The convenient, built-in sensor identification function lets you simply connect the sensor to easily configure the scaling settings through automatic recognition. Combine the High Speed Analog Unit U8976 and a Hioki current probe or clamp-on probe for high-precision wideband observation of current waveforms. Furthermore, install the optional Probe Power Unit Z5021 to drive these probes from the MR6000 main unit.

# Triggers that detect targeted events

Set triggers on any channel to record data whenever an event occurs.

Level trigger	Compares to one voltage value.
Window trigger	Compares to two voltage values.
Voltage drop trigger	Detects voltage drops in commercial power lines.
Period trigger	Monitors periods.
Glitch trigger	Detects anomalies in pulses.
Pattern trigger	Compares when the logic signal is ON/OFF.

### Setting multiple triggers for a single channel

Set up to 4 triggers for a single channel. If, for instance, you set the glitch, level, window-in, and window-out triggers for the same input waveform, that waveform is monitored according to the set trigger conditions.

Various triggers x Up to 4 Settable for any channel

# Observe fluctuations over the long-term with high-speed sampling

The system uses the envelope measurement method to record maximum and minimum values at set intervals while performing oversampling at 100 MS/s. The internal memory has a capacity of 1 G-words, which ensures that the measuring process continues for a long time without any data losses. Save data in real time while measuring.

Oversampling speed	Recording intervals	1 ch	 9 to 16 ch
	10 MS/s	50 s	 2 s
	1 MS/s	8 m 20 s	 20 s
	100 kS/s	1 h 23 m 20 s	 3 m 20 s
100 MS/s	10 kS/s	13 h 53 m 20 s	 33 m 20 s

	-	:	
	20 S/s	289 d 8 h 26 m 40 s	 11 d 13 h 46 m 40 s
	:	:	 :

Limitations apply to measurable time when the U8975, U8977, U8978, or MR8990 is in use, and when performing real-time waveform processing.

## Equipped with a powerful data analysis function

#### FFT calculation function (Equipped from Ver. 2.10)

NEW ALL Installed in MR6000, MR6000-01

Analyze 8 phenomena at the same time with a single measurement. Multiple FFT analyses of signals input from different channels let you investigate the frequency components that appeared for each channel at a single point in time. Similarly, conduct a variety of analyses for a single signal simultaneously.

-	Sampling	Points	-	Recording time Mode

Supports complex calculations

#### Real-time waveform processing

#### ONLY Installed in MR6000-01

#### Calculate measurement data during measurement

The MR6000-01 further features a powerful technology designed for robust real-time waveform processing. This function performs the four arithmetic operations (addition, subtraction, multiplication, and division), differentiation calculations, or integration calculations during the measuring process, letting you use check the calculated results via waveforms while measuring. Results can be further processed after measurement and saved.

	W1	Comment	addition	
	On	Formula	(CH(1, 1)) + (CH(1, 1))	
		Comment	sabtraction	
	On	Formula	(CH(1, 1)) - (CH(1, 1))

			multiplication (CH(1, 1)) x (CH(1, 1))	

Simple setting method

Dedicated equipment installed only in the MR6000-01 for realtime waveform processing

#### FFT analysis directly from the memory waveform

Perform FFT analysis from measured data. Simply touch the screen to specify the starting point for analysis, while simultaneously viewing the calculation results.

Chronological order + FFT calculation screen

#### Numerical calculation function

ALL Installed in MR6000, MR6000-01

Analyze measured waveforms with numerical parameters. The MR6000 features several new numerical calculation functions including those for identifying overshoot and undershoot. In addition to analog and logic channels, the MR6000 can also perform calculations on real-time waveform processing channels, and features a numerical comparator function.

Average value	Average value Rise time		Amplitude
RMS value	Fall time	Pulse count	Overshoot
Peak to peak value	Standard deviation	Four arithmetic operations	Undershoot
Maximum value	Area value	Time difference	+Width
Time to maximum value	X-Y area value	Phase difference	-Width
Minimum value	Specified level time	High-level	Burst width
Time to minimum value	Specified time level	Low-level	Integration values
Period	Pulse width	Median value	XY waveform angle
Frequency			

Simultaneous calculations of up to 16 out of a total of 33 computations

# Digital filter calculation

#### Observe clear waveforms without noise

Remove harmonic noise or specific frequency noise from measurement data. Use it to eliminate the noise that cannot be resolved with the standard filter installed in the unit.

Digital filter disabled

Digital filter enabled

# Highest Transfer Speed in the Entire Series

# Data transfer up to 32 times faster compared to conventional models Outstanding real-time save function that saves data during measurement

The MR6000 features a brand new interface that makes data transfer up to 32 times faster. In addition, faster internal processing allows data to be saved to external media in real time during measurement.

#### Drastically increased data transfer speed

Data transfer to storage devices is now up to 32 times faster. While conventional models transferred data at 1 MS/s in a single channel, the MR6000 transfers data for 32 channels.

\*Compared to other recorders in the Hioki Memory HiCorder series. \*Results vary according to measurement conditions.

### Saving data directly to your PC

Transfer measurement data directly to your PC by using the FTP sending function together with the real-time save function. This makes it easier to observe data after the measuring process.

# Longest Continuous Recording in the Entire Series

# Long-term recording and high-speed sampling in multiple channels All in a single measurement

The real-time save function controls the available measurement duration without relying on the capacity of the internal storage memory. For long-term recording, we recommend a high-capacity SSD or HD unit. You can also use a more convenient USB memory stick or SD memory card. All phenomena can be recorded at a high sampling rate over a long period of time. This feature is ideal for situations where it is hard to predict the nature of a phenomenon or for measurements that can only be performed once. When saved in real time, data is split into several 512 MB files.

d: days h: hours min: minutes s: seconds

#### Available real-time save duration for various media

# User-Friendly Flexible Design

# Fast and convenient touch screen Operation as smooth as silk

The capacitive touch screen delivers intuitive operability.

Select a setting item directly by tapping the screen, and use your fingers to enlarge the part you want to see.

The new user interface makes setting measurement items for multiple channels easier compared to the more complicated conventional models where you had to press the keys several times to configure a setting.

▲ Use the rotary knobs to move the tracing cursor.

Touch screen 12.1 inches

Large LCD

0

▲ Simply tap the screen to switch between the items you want to set.

# Easy method for pinpointing a specific waveform within large amounts of measurement data

Set the peak values or trigger conditions you want to search for to have the relevant data retrieved and displayed automatically. Our new Memory HiCorder Concierge function automatically calculates the characteristics of the reference waveform you have set and searches all of the measured data to detect and array any waveforms with low similarity as anomalous waveforms. This drastically reduces the amount of time required to search for anomalies by eliminating the need to scroll through measured waveforms and check them visually.

## Memory HiCorder Concierge

#### Use the Concierge to look for anomalous waveforms.

A new waveform search function finds anomalous waveforms in all of the measured data. This function is ideal for situations where it is difficult to set the right triggers before measuring because the nature of potential anomalies cannot be predicted.

Automatically search for waveforms with low similarity to the reference waveform

### Rich set of search functions

Registering a reference waveform

#### Peak search

Search for the maximum value, minimum value, local maxima, or local minima in all of the measured data, and mark the search point in the waveform.

#### Trigger search

Set trigger conditions for all of the measured data again to search for points where the conditions are fulfilled, even if no triggers were set during the measuring process.

#### Jump

New function Waveform

Search Automatically search

for anomalous

waveforms

Jump to an event mark you made while measuring, to the cursor position on the display, or to the location measured at a specified time.

## Radically improved data saving time

Transferring very large amounts of data measured over a long period of time used to be very time-consuming. The MR6000 features a brand new interface and faster internal processing, reducing the time required to save measurement data to media. This saves you the trouble of waiting for data to be saved and improves work efficiency.

USB 2.0	Existing models

# Operability and visibility suited for a variety of work environments

## Ergonomical operating angle

Our search for a touch screen with the best operability and visibility angle led us to develop retractable feet that maximize those two important attributes. Tilting the MR6000 with the feet reduces the strain on your wrists when you use the device on a desk, and keeps your line of sight at a natural level. The rear side also features the same retractable feet, making is easy to use the device on the floor.

## Space-saving size

We have achieved a design that is compact while still delivering blazing fast processing speeds by using thermal liquid analysis to optimally position the air inlets, heating components, and cooling fans. The smaller form factor requires less space for installation, making the device just right for tight workspaces.

# Sleek details

HIOKI

Easy multi-touch

Horizontal and vertical

When compared to 8861-50

# Easy handling

The rubber handle boasts excellent grip and makes it easy to carry the device with either one or both hands. The grips on either side of the device can also be used to lift it with both hands.

Simple protectors on the top and bottom right side of the device protect the interface and unit input terminals from sudden physical shocks.

Refined attractive shape

The bevelled chassis edges give the device a compact and sleek look. The left side is slightly curved with slits to match the mesh of the air outlet. The air outlet is therefore in harmony with the design of the flat and solid-looking chassis. The simple and refined appearance achieved by these efforts well suits a device used for R&D purposes.

conditions Time axis accuracy	±0.0005%		
Display			
Display type	12.1 inch XGA TFT c	olor LCD (1024 x 768 dots) with capacitive touch screen	
LAN Interface			
Compatibility specifications Functions		1000BASE-T, 100BASE-TX, 10BASE-T TTP, e-mail sending function	
Connector	RJ-45		
Maximum cable length	100 m (328.11 ft)		
USB interface Compatibility specifications	USB 3.0 compliants	< 3, USB 2.0 compliant x 4	
Host	Connector: Series A	receptacle	
Available options	Connected devices Z4006 USB MEMOR	: Keyboard, mouse, USB memory stick RY STICK (16 GB)	
SD card slot			
Compatibility specifications		ndards x 1 (compatible with SD, SDHC, SDXC memory cards)	
Available options SATA interface	24001 SD MEMORY C	CARD (2 GB), Z4003 SD MEMORY CARD (8 GB)	
Compatibility specifications	Serial ATA Revision	3.0 compliant x 1	
Available options Monitor output	U8332 SSD UNIT (2	56 GB), U8333 HD UNIT (320 GB)	
Connector	DVI-I Digital output for exte	rnal dienlaue 1024 y 769 (VCA) *Not compatible with a 18-1	
Output type		rnal displays 1024 x 768 (XGA) *Not compatible with dual link	
Connector	terminal SMB 10 V DC		
Connector Maximum input voltage Input voltage	SMB 10 V DC 2.5 V to 10 V for high	n level, 0 V to 0.8 V for low level	
Connector Maximum input voltage Input voltage Response pulse width	SMB 10 V DC 2.5 V to 10 V for high 50 ns or more during	n level, 0 V to 0.8 V for low level g high periods, 50 ns or more during low periods	
Connector Maximum input voltage Input voltage Response pulse width Maximum input frequency	SMB 10 V DC 2.5 V to 10 V for high 50 ns or more during 10 MHz

Trigger source	When START or ST "Up to 4 analog tri "Up to 4 logic trigg: "Up to 2 analog trigg: When START&STO Analog: Up to 16 cl Logic: Up to 16 pi Real-time waveforr "Up to 2 trigger ty	me waveform processing OP is selected: Up to 32 channels gers can be set for each analog channel. gers can be set for each logic probe. Jers can be set for each real-time waveform processing channel. P is selected: Up to 16 channels / group nannels / group (Up to 2 channels per unit can be selected.) obes / group (Up to 2 channels per unit can be selected.) n processing: Up to 16 calculations / group gers from each group can be set for each logic probe.
	External trigger	
		n is activated if all trigger sources are turned off.
	Level trigger	Triggering occurs when the set level rises (falls).
	Voltage drop	Triggering occurs when peak voltage drops below the set level. (For a 50 Hz / 60 Hz commercial power supply only)
	trigger	*1, *2, *3
	Window trigger	Sets the upper and lower limit for trigger level. Triggering occurs when leaving (OUT) or entering (IN) the area.
	window ingger	*1
	Period trigger	Sets the period reference value and cycle range. Triggering occurs when the rising (falling) reference value period is measured and determined to be outside or within the cycle range.
Analog triggers		*1, *2, *3 Sets the reference value and pulse width (glitch width).
	Glitch trigger	Triggering occurs if the value is below the set pulse width from rising or falling of the reference value. *1, *Not available with MR8990, *3
	Specifying events	Specifying events (1 to 4000) Counts the number of times conditions were fulfilled for each trigger source. Triggering occurs when the set number of times is reached. *Not available when the trigger conditions are set to AND
		*1: Disabled when sampling rate is set to 200 MS/s. *2: Not available with MR8990 or 8970
Logic trigger	Pattern trigger using	*3: Not available with envelope setting
Forcible trigger		iggering can be prioritized over all trigger sources.)
	Recording possible a	t specified measuring intervals (hours, minutes, or seconds)
Interval trigger	The trigger condition Afterwards, the trigg	ns are fulfilled when the measuring process starts. ger conditions are met at the set measuring intervals. OFF, 10, 20, 50, 100, 150, 200, 250, 500, 1000, 2000,
Trigger filter	Normal	5000, 10,000 samples
Level setting resolution	Envelope 1 LSB	OFF, 1 ms, 10 ms
-		lue set in 1% steps available), displaying the recording
Pre-trigger	time for pre-trigger	
Post-trigger		ng the recording time for post-trigger
Trigger priority Trigger mark	ON / OFF Displays trigger mar	ks for the positions where triggers are set.
Trigger timing	START, STOP, STAR	
Waveform monitoring	Displays the wavefo	rm monitor in the trigger standby state. (The display can
display	be turned off.)	
Waveform screen	Waveform display	1 screen, 2 screens, 4 screens, 8 screens, 16 screens
	in chronological	*Displays up to 64 channels per sheet.
Numerical display format	FFT display	*Multiple sheets can be set for the same channel. 1 screen, 2 screens, 4 screens Waveform in chronological order + FFT display
Sheet function	Up to 16 sheets	(1 screen, 2 screens, 4 screens) *The display format can be selected for each sheet.
		are displayed in chronological order in the top part of the
Zoom display		reas the zoomed waveforms are displayed in the bottom part.)
Full screen display		over the entire waveform screen.
	Waveform color Interpolation	Fixed colors (32 colors) Linear
	Variable display	Always ON
	Vernier	Adjustable input waveform
Waveform display		(Adjustment range: 50% to 250% of the input) OFF / ON
	Grid	Wide / Standard / Narrow
	waveform inversion	*Not available with 8967, 8970, and 8973
Enlarge / Reduce	Allows you to adjust	the zoom ratio as necessary by pinching in or out.
Waveform scrolling	,	swiping the screen and scroll back while measuring.
Roll display mode	The drawing start po	latest data by following the measuring process. sition (left or right edge) can be selected. displayed when the overlay function is turned on.
Waveform monitoring function	ON / OFF (The moni	tor can also be displayed in the trigger standby state.)
	1	
		or manual option can be selected.

## **Option Specifications** (sold separately)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 280 g (9.9 oz)

Accessories: Noi	ne	
HIGH SPEED ANAL U8976	.OG UNIT	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and zero adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2,	or voltage measurement
Input terminals	Max. rated voltage t the maximum voltage	actor (input impedance 1 $M\Omega$ , input capacitance 22 pF) o ground:1000 V AC, DC (with input isolated from the unit, le that can be applied between input channel and chassis channels without damage)
Measurement range		00, 200, 400 V f.s., 12 ranges ible measurement/display: 280 V rms
Measurement resolution	1/1600 of measuren	nent range (using 12-bit A/D conversion)
Maximum sampling rate	200 MS/s (simultane	eous sampling in 2 channels)
Measurement accuracy	±0.5% f.s. (with filte	r 5 Hz, zero position accuracy included)
Frequency characteristics	DC to 30 MHz -3 dE	8 (with AC coupling: 7 Hz to 30 MHz -3 dB)
Input coupling	AC/DC/GND	
Maximum input	400 V DC (with dire	ct input), 1000 V DC (with 9665)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: None

ANALOG UNIT 896	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% FH after 30 minutes of warm- up time and zero adjustment; Accuracy guaranteed for 1 year, Post- adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage measurement
Input terminals	Isolated BNC connector (input impedance 1 MΩ, input capacitance 30 pF), Max. rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Measurement range	100, 200, 400 mV f.s. 1, 2, 4, 10, 20, 40, 100, 200, 400 V f.s., 12 ranges AC voltage for possible measurement/display: 280 V rms Low-pass filter: 5/50/500/5 k/50 k/500 kHz
Measurement resolution	1/2000 of measurement range (using 12-bit A/D conversion)
Maximum sampling rate	20 MS/s (simultaneous sampling across 2 channels)
Measurement accuracy	±0.5% f.s. (with filter 5 Hz, zero position accuracy included)
Frequency characteristics	DC to 5 MHz -3 dB (with AC coupling: 7 Hz to 5 MHz -3 dB)
Input coupling	AC/DC/GND
Maximum input voltage	400 V DC (the maximum voltage that can be applied across input pins without damage)

Accessories. No	ine in the second se
HIGH RESOLUTIO 8968	N UNIT (Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and zero adjustment; Accuracy guaranteed for 1 yea Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for voltage measurement
Input terminals	Isolated BNC connector (input impedance 1 MΩ, input capacitance 30 pF), Max. rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Measurement range	100, 200, 400 mV f.s. 1, 2, 4, 10, 20, 40, 100, 200, 400 V f.s., 12 ranges AC voltage for possible measurement/display: 280 V rms Low-pass filter: 5/50/500/5 k/50 kHz
Anti-aliasing filter	Integrated filter for suppressing aliasing distortion caused by FFT processing (automatic cutoff frequency setting/OFF)
Measurement resolution	1/32,000 of measurement range (using 16-bit A/D conversion)
Maximum sampling rate	1 MS/s (simultaneous sampling across 2 channels)
Measurement accuracy	±0.3% f.s. (with filter 5 Hz, zero position accuracy included)
Frequency characteristics	DC to 100 kHz -3 dB (with AC coupling: 7 Hz to 100 kHz -3 dB)
Input coupling	AC/DC/GND
Maximum input voltage	400 V DC (the maximum voltage that can be applied across input pins without damage)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: None

Frequency characteristics	DC to 2 MHz -3 dB
Input coupling	DC / GND
Maximum input voltage	40 V DC (with direct input), 400 V DC (with 9665)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 260 g (9.2 oz)

DIGITAL VOLTMET MR8990	FER UNIT (Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm-up time and calibration, Accuracy guaranteed for 1 year, Post- adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for DC voltage measurement
Input terminals	Banana input connectors (Input resistance: 100 M $\Omega$ or higher with 100 mV f.s. to 10 V f.s. range, otherwise 10 M $\Omega$ ) Max. rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channel without damage)
Measurement range	100, 1000 mV f.s. 10, 100, 1000 V f.s., 5 ranges
Measurement resolution	1/1,000,000 of measurement range (using 24-bit $\Delta\Sigma$ modulation A/D)
Integration Time	20 ms × NPLC (during 50 Hz), 16.67 ms × NPLC (during 60 Hz)
Response time	2 ms +2× integration time or less (rise - f.s. $\rightarrow$ + f.s., fall + f.s. $\rightarrow$ - f.s.)
Basic measurement accuracy	±0.01% rdg. ±0.0025% f.s. (at range of 1000 mV f.s.)
Maximum input voltage	500 V DC (the maximum voltage that can be applied across input pins without damage)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 245 g (8.6 oz) Accessories: CONVERSION CABLE L9769 x 2 (cable length 60 cm (1.97 ft))

(Accuracy at 23 ±5°C/73 ±9°F, 80% RH or less a warm-up time and auto-balance: Accuracy quar **STRAIN UNIT U8969** 1 year, Post-adjustment accuracy guarantee d for 1 y No. of channels: 2, for distortion measurement (electronic auto-balancing, Measurement functions balance adjustment range within ±10,000 µc or less) NDIS connector EPRC07-R9FNDIS (via CONVERSION CABLE L9769, NDIS connector PRC03-12A10-7M10.5) Input terminals Max. rated voltage to ground: 30 V AC rms or 60 V DC (with input isolated from the main unit, the maximum voltage that can be applied between input channel and chassis, and between input channels without damage) Strain gauge converter, Suitable transducer Bridge impedance:  $120 \Omega$  to  $1 k\Omega$ , Bridge voltage:  $2 V \pm 0.05 V$ , Gauge rate: 2.0 400, 1000, 2000, 4000, 10,000, 20,000 με f.s., 6 ranges Measurement range Low-pass filter: 5/10/100/1 kHz Measurement resolution 1/25,000 of measurement range (using 16-bit A/D conversion) Maximum sampling rate 200 kS/s (simultaneous sampling across 2 channels) Measurement accuracy ±0.5% f.s. ±4 με (5 Hz filter ON) After auto-balancing Frequency DC to 20 kHz +1/-3 dB characteristics

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 230 g (8.1 oz) Accessories: None

CHARGE UNIT U897	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% RH after 30 minutes of warm- up time and zero adjustment, Accuracy guaranteed for 1 year, Post- adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for acceleration measurement
Input terminals	Voltage input / pre-amp embedded input: Metal BNC connector (Under voltage input: input impedance 1 MΩ, input capacitance 200 pF or less) Charge input: Miniature connector (#10-32UNF) Max. rated voltage to ground: 30 V AC or 60 V DC (with input isolated from the main unit, the maximum voltage that can be applied between input channel and chassis, and between input channels without damage) *Voltage input terminal GND and charge input terminal GND for the same channel are shared.
Suitable transducer	Charge output type acceleration detector Pre-amp embedded acceleration detector
Measurement range Charge input (Miniature connector) Pre-amp embedded input (BNC connector)	1 (m/s <sup>2</sup> ) to 200 k (m/s <sup>2</sup> ) f.s., 12 ranges x 6 types Charge input sensitivity: 0.1 to 10 pC /(m/s <sup>2</sup> ) Pre-amp embedded sensor input sensitivity: 0.1 to 10 mV /(m/s <sup>2</sup> ) Amplitude accuracy: ±2% f.s. Frequency characteristics: 1(1.5) to 50 kHz -3 dB (charge input) Low-pass filter: 500/5 kHz Pre-amp supply power: 3.5 mA ±20%. 22 V ±5% Maximum input charge: ±500 pC (6 ranges on high sensitivity side), 50.000 pC (6 ranges on low sensitivity side)
Measurement range Voltage input (BNC connector)	10 mV to 40 V f.s., 12 ranges, DC amplitude accuracy: ±0.5% f.s. Frequency characteristics: DC to 50 kHz -3 dB (with DC coupling), 1 Hz to 50 kHz -3 dB (with AC coupling) Low-pass filter: 5/500/5 kHz, input coupling: AC/DC/GND Maximum input voltage: 40 V DC
Measurement resolution	1/25,000 of measurement range (using 16-bit A/D conversion)
Maximum sampling rate	200 kS/s
Anti-aliasing filter	Integrated filter for suppressing aliasing distortion caused by FFT processing (automatic cutoff frequency setting/OFF)
TEDS	IEEE 1451.1.4 class 1 support (Support for sensor information reading and automatic sensitivity setting)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: CONVERSION CABLE 9318 x 2 (To connect the current sensor to the 8971)

CURRENT UNIT 897	(Accuracy at 23 ±5°C/73 ±9°F, 20 to 80% FH after 30 minutes of warm- up time and zero adjustment; Accuracy guaranteed for 1 year, Post- adjustment accuracy guaranteed for 1 year)	
Measurement functions	No. of channels: 2, Current measurement with optional current sensor	
Input terminals	Sensor connector (input impedance 1 M $\Omega$ , exclusive connector for current sensor via conversion cable the 9318, common GND with recorder)	
Compatible current sensors	CT6862, CT6863, 9709, CT6865, CT6841, CT6843, CT6844, CT6845, CT6846, 9272-10 (To connect to the 8971 via the CONVERSION CABLE 9318)	
Measurement range	Using 9272-10 (20 A), CT6841: 2 A to 100 A f.s., 6 ranges Using CT6862: 4 A to 200 A f.s., 6 ranges Using 9272-10 (200 A), CT6843, CT6863: 20 A to 1000 A f.s., 6 ranges Using CT6844, CT6845, 9709, CT6846*1, CT6865*1: 40 A to 2000 A f.s., 6 ranges *1: The conversion ratio needs to be set to 2 for scaling.	
Measurement accuracy (with 5 Hz filter ON)	±0.65% f.s. RMS accuracy: ±1% f.s. (DC, 30 Hz to 1 kHz), ±3% f.s. (1 kHz to 10 kHz)	
Note: Add the accuracy and attributes of the current sensor being used.	RMS response time: 100 ms (rise time from 0 to 90% of full scale) Crest factor: 2 Frequency characteristics: DC to 100 kHz ±3 dB (with AC coupling: 7 Hz to 100 kHz)	
Measurement resolution	1/2000 of measurement range (using 12-bit A/D conversion)	
Maximum sampling rate	1 MS/s (simultaneous sampling across 2 channels)	
Other functions	Input coupling: AC/DC/GND, Low-pass filter: 5/50/500/5 k/50 kHz	

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 190 g (6.7 oz) Accessories: None

TEMP UNIT 8967	adjustment; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)
Measurement functions	No. of channels: 2, for temperature measurement with thermocouple (voltage measurement not available)
Input terminals	Thermocouple input: Push-button terminal block, Recommended wire diameter: single-wire 0.14 to 1.5 mm <sup>2</sup> , braided wire 0.14 to 1.0 mm <sup>2</sup> (conductor wire diameter $\phi$ 0.18 mm (0.01 in) or more), AWG 26 to 16 lnput impedance: min. 5 MΩ (with line fault detection ON/OFF) Max. rated voltage to ground: 300 V AC, DC (with input isolated from the unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage)
Temperature measurement range Note: Upper and lower limit values depend on the thermocouple	200°C (392°F) f.s. (-100°C to 200°C (-148°F to 392°F)), 1000°C (1832°F) f.s. (-200°C to 1000°C (-328°F to 1832°F)), 2000°C (3632°F) f.s. (-200°C to 2000°C (-328°F to 3632°F)), 3 ranges Measurement resolution: 1/20,000 of measurement range (using 16-bit A/D conversion)
Thermocouple range (JIS C 1602-1995) (ASTM E-988-96)	K: -200°C to 1350°C (-328°F to 2462°F), J: -200°C to 1100°C (-328°F to 2012°F), E: -200°C to 800°C (-328°F to 1472°F), T: -200°C to 400°C (-328°F to 752°F), N: -200°C to 1300°C (-328°F to 2372°F), N: 0°C to 1700°C (32°F to 3092°F), S: 0°C to 1700°C (32°F to 3092°F), B: 400°C to 1800°C (752°F to 3272°F), W (WRe5-26): 0 to 2000°C (32°F to 3632°F) Reference junction compensation: internal/ external (switchable), line fault detection ON/OFF possible
Data refresh rate	3 methods, Fast:1.2 ms (digital filter OFF), Normal:100 ms (digital filter 50/60 Hz), Slow: 500 ms (digital filter 10 Hz)
Measurement accuracy	Thermocouple K, J, E, T, N: $\pm 0.1\%$ f.s. $\pm 1^{\circ}C$ ( $\pm 1.8^{\circ}F$ ), ( $\pm 0.1\%$ f.s. $\pm 2^{\circ}C$ ( $\pm 3.6^{\circ}F$ ) at $\pm 200^{\circ}C$ to $0^{\circ}C$ ( $-328^{\circ}F$ to $32^{\circ}F$ )) Thermocouple R, S, B, W: $\pm 0.1\%$ f.s. $\pm 3.5^{\circ}C$ ( $\pm 6.3^{\circ}F$ )(at $0^{\circ}C$ ( $32^{\circ}F$ ) to less than $400^{\circ}C$ ( $752^{\circ}F$ ); However, no accuracy guarantee at less than $400^{\circ}C$ ( $752^{\circ}F$ ) for B), $\pm 0.1\%$ f.s. $\pm 3^{\circ}C$ ( $\pm 5.4^{\circ}F$ ) (at $400^{\circ}C$ or more) Reference junction compensation [RJC] accuracy: $\pm 1.5^{\circ}C$ ( $\pm 2.7^{\circ}F$ ) (added to measurement accuracy with internal reference junction compensation)

Dimensions/mass: approx. 106 mm (4.17 in) W x 19.8 mm (0.78 in) H x 196.5 mm (7.74 in) D, approx. 250 g (8.8 oz) Accessories: None 0 0 (Accuracy at 23  $\pm5^\circ\text{C/73}$   $\pm9^\circ\text{F}$  20 to 80 % RH after 30 minutes of warm-up time; Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year) FREQ UNIT 8970 No. of channels: 2, for voltage input based frequency measurement, Measurement Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 30 pF), Isolated BNC connector (input impedance 1 M $\Omega$ , input capacitance 30 pF), functions Max. rated voltage to ground: 300 V AC, DC (with input isolated from the Input terminals unit, the maximum voltage that can be applied between input channel and chassis and between input channels without damage) Measurement range: Between DC to 100 kHz (minimum pulse width 2 µs), 20 Hz to 100 kHz f.s., 8 ranges Accuracy: ±0.1% f.s. (exclude 100 kHz range), ±0.7% f.s. (100 kHz range) Frequency mode Measurement range: Between 0 to 2 million rotations/minute (minimum pulse width 2 µs), 2 kr/min to 2 Mr/min f.s, 7 ranges Rotation mode Accuracy: ±0.1% f.s. (exclude 2 Mr/min range), ±0.7% f.s. (2 Mr/min range) Measurement range: 50 Hz (40 to 60 Hz), 60 Hz (50 to 70 Hz), 400 Hz (390 to Power frequency 410 Hz), 3 ranges mode Accuracy: ±0.03 Hz (50, 60 Hz), ±0.1 Hz (400 Hz range) Measurement range: 40 k-counts f.s. to 20 M-counts f.s. 6 ranges Integration mode Accuracy: ±0.0025% f.s. Measurement range: Between 10 Hz to 100 kHz (minimum pulse width 2  $\mu$ s), 100% f.s. Accuracy: ±1% (10 to 10 kHz), ±4% (10 k to 100 kHz) Duty ratio mode Measurement range: Between 2 µs to 2 s, 10 ms to 2 s f.s Pulse width mode Accuracy: ±0.1% f.s. 0.0025% f.s. (Integration mode), 0.01% f.s. (exclude integration, power Measurement resolution requency mode),0.01 Hz (power frequency mode) Input voltage range ±10 V to ±400 V, 6 ranges, selectable threshold level at each range and threshold level Slope, Level, Hold, Smoothing, Low-pass filter, Switchable DC/AC input Other functions coupling, Frequency dividing, Integration over-range keep/return

## System Chart of Options

# **R&D** Tests and Critical Analyses Meeting the High Demands of a Broad Range of Industries

#### High-speed 200 MS/s measurement of inverter waveforms

Perform high-speed isolated recording across 16 channels at 200 MS/s by installing 8 units of U8976.

MEMORY HICORDER	MR6000	1 unit
HIGH SPEED ANALOG UNIT	U8976	8
10:1 PROBE	9665	16

Example configurations

MR6000E3-92E Printed in Japan

## Multi-channel measurement for ECU development

Perform multi-channel recording across 32 channels at 5 MS/s by installing 8 units of U8975.

MEMORY HICORDER	MR6000	1 unit
4ch ANALOG UNIT	U8975	8
CONNECTION CORD	L9790	32
ALLIGATOR CLIP	L9790-01	32

Perform mixed multi-channel measurements across 16 analog and 64 logic channels by installing 4 units of U8975 and 4 units of 8973.

MEMORY HICORDER	MR6000	1 unit
4ch ANALOG UNIT	U8975	4
CONNECTION CORD	L9790	16
ALLIGATOR CLIP	L9790-01	16
LOGIC UNIT	8973	4
LOGIC PROBE	9327	16

### Remove harmonic noise

The MR6000-01 comes with a digital filter calculation function that removes specific frequency noise from measurement data.

MEMORY HICORDER	MR6000-01	1 unit
ANALOG UNIT	8966	8
CONNECTION CORD	L9790	16
ALLIGATOR CLIP	L9790-01	16
